# AGID (Coggins) Testing Considerations: Follow Protocols Exactly

**Fill the wells properly.**

All wells underfilled

All wells filled properly\*

Top well overfilled

**Slightly concave meniscus**

\*With 15 mL of agar in each level plate, each well should accept between 65 and 70  $\mu$ L of sample.

**Use optimal agar.**

**Use an intense light source.**

**Convex meniscus—spills occur**

**Interpret accurately.**

**Samples 2 and 3 (taken 21 and 29 days after infection) are positive.**

**Optimal Caramelized (slightly brown)**

**Reduce ambient light for better viewing.**

---

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, sex, religion, age, disability, political beliefs, sexual orientation, or marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 1400 Independence Avenue, SW, Washington, DC 20250-9410 or call (202) 720-5964 (voice and TDD). USDA is an equal opportunity provider and employer.
